TREES and SHRUBS

COLORADO BLUE SPRUCE 6-12" seedling - Dry, well-drained soil. Height 30-50'. Sharp pointed needles, green to blue color. Extremely hardy and adaptable to a variety of conditions. Drought-tolerant once established, and will thrive in partial to full sun. Excellent for windbreaks, ornamental, or Christmas trees.

FRASER FIR 6-12" transplant Moist soil. Full to partial sun. Height 30-50'. Referred to as the "Cadillac of Christmas trees." The branches turn slightly upward, have good form and excellent needle-retention. They are dark blue-green in color and the needles have a silver underside. Produces an excellent fragrance.

NORWAY PINE (RED PINE) 7-15" transplant- Medium to dry soil, full sun. Height up to 100'. Needles 4.5" to 6.5" long and two to a cluster, loses its lower limbs early. The bark of the red pine is flaky and orange-red in color. Grow very rapidly for their first 60 or 70 years. Is a good timber-producing tree.

NORWAY SPRUCE 7-15" transplant - Moist to medium soil, prefers full sun. Height 40-60'. Cone is 4"-6" long. Medium to fast growing, Needles are 1/2" to 1" long, squarish with a nice dark green color, branches have a pendulous habit.

WHITE PINE 7-15" transplant- Moist to dry soil, somewhat shade tolerant. Height 80'. Needles are 4" to 6" long and five to a cluster. The ease of transplanting and rapid growth of the White Pine tree makes it ideal for windscreen. Provides great wildlife habitat.

WHITE SPRUCE 9-14" seedling-Moist to dry soil, does well in full sun. Height 40- 60'. Needles are four-sided, crowded along branchlets; length 1/3" to 3/4"; dark bluish-green. Besides providing nesting sites and shelter, provides food for many kinds of wildlife. Pyramidal, makes a good screen.

AMERICAN PLUM 18-24" seedling- Medium soil, full sun/part shade. Height 15-25'. A thicket-forming shrub or small tree with short trunk, spreading branches and thorns. It has a broad crown, showy large white flowers, and produces red plums which ripen to a shiny and bright red in August or September. The plums are eaten fresh but used mainly for jellies and preserves, and are also consumed by many kinds of birds. Serve as a hedgerow or windbreak and provides thick cover for wildlife.

CRANBERRY BUSH 18-24" seedling- Moist to medium soils, full sun to part shade. Height 8-12'. Maple-like shaped leaves. Showy snow-white flowers, bright red fruit persists into winter. The berries soften and sweeten over winter, and are eaten by birds. The very-tart berries are excellent in jams jellies.

SERVICEBERRY (JUNEBERRY) 18-24" seedling- Medium to well-drained soil, full sun/part shade. Height 8-15'. Large shrub with beautiful fall colors. White spring flowers giving way to fruit loved by birds. Berries resemble blueberries in size and color and are often used in jams, jellies and pies.

RED-OSIER DOGWOOD 18-24"seedling- Moist to wet soil, part shade. Height 6-9'. Stems turn a yellow-green in the spring changing to a very colorful coral-red from November through March. Dark green leaves turn purplish-red in the fall. White flowers appear in late May, with white fruit in August-September which attracts birds.

SILKY DOGWOOD 18-24"seedling- Moist to wet soil, Tolerates poorly drained soil and a range of light conditions from full sun to partial or full shade. Height 9-12.' Attractive white, greenish-white or yellow flower clusters in the spring and blue and white fruit in the fall. Used for hedgerows, windbreaks and for stream bank erosion control. The fruits are bluish in color and are eaten by game birds, especially important as a source of food for migrating songbirds.

WASHBURN COUNTY LAND WATER CONSERVATION DEPT

NATIVE PERENNIAL WILDFLOWERS & GRASSES

For Habitat Restoration and Native Gardening

Good for restoring a prairie or creating a beautiful lakeshore habitat. You can garden with these super-hardy, drought-tolerant and pest-resistant native perennials. They handle plenty of neglect while providing loads of flowers that will attract bees, butterflies and birds throughout the summer. **Plants in each collection are selected by the nursery based on the growing season.**

Collection 1 - Short Butterfly/Pollinator 32 plants in 2" pots

Habitat: Dry

Height: 12-24"

Full-Part Sun

A combination of dry species that provide nectar sources and caterpillar host plants to attract butterflies. Grasses are also a great addition for the butterfly planting to provide resting spaces and protective cover. 4 each of 8 different species (7 flowers and 1 grass) of any of the following: Wild Onion, Pearly Everlasting, Butterfly Weed, Prairie Coreopsis, White Prairie Clover, Purple Prairie Clover, Alum Root, Rough Blazing Star, Hoary Vervain, Pussy Toes, Upland White Aster, Harebell, Spotted Bee Balm, Prairie Coneflower, June Grass, Blue Grama Grass, Side-oats Grama grass.

Collection 2 - Wetland 32 plants in 2" pots

Habitat: Wet Prairie/Marsh/Lake Edge

Height: 24-48"

Full Sun-Part Shade

The perfect mix of colorful wildflowers and beautiful grasses to stabilize shorelines, improve lake health, or replace wet areas of lawn that are difficult to mow.

4 each of 8 different species (5 flowers and 3 sedges) of any of the following: Sweet Flag, Swamp Milkweed, New England Aster, Sneezeweed, Prairie Blazingstar, Cardinal Flower, Blue Lobelia, Orange Coneflower, Brown-eyed Susan, Common Rush, Green Bulrush, Bottlebrush Sedge, Hop Sedge, Fox Sedge.

Collection 3 - Prairie 32 plants in 2" pots

Habitat: Dry/Mesic

Height: 24-60"

Full-Part Sun

Includes the best prairie grasses and wildflowers combined. Free yourself from the oppression of mowing lawn.

4 each of 8 different species (5 flowers and 3 grass) of any of the following: Anise Hyssop, Early Sunflower, Meadow Blazing Star, Smooth Penstemon, Orange Coneflower, Purple Coneflower, Wild Bergamot, Royal Catchfly, Culver's Root, Indian Grass, Switch Grass, Little Bluestem Grass.

Collection 4 - Woodland 32 plants in 2" pots

Habitat: Woodland

Height: 24-60"

Shade

Only shade tolerant species will thrive in forested conditions. This is the collection to begin restoring and beautifying any degraded woodland understory or shady areas of your yard.

6-8 species of any of the following: Columbine, Big-leaf Aster, Calico Aster, Short's Aster, Northern Bedstraw, Wild Strawberry, Hairy Beardtongue, Eastern Star Sedge (not for the sand counties), Pennsylvania Sedge
